

Multidimensional Signal Processing and Its Applications

This Special Issue is devoted to recent advances in MD signal processing related to the analysis and use of symmetries in different multidisciplinary areas. The topics of interest include but are not limited to:

- multidimensional signal processing
- tensor image decomposition
- medical information systems
- telecommunications
- computer vision
- healthcare
- bioinformatics
- remote ecological monitoring
- agriculture
- forestry

Submissions Deadline: **15 May 2021**

- **High Visibility:** Indexed by Science Citation Index Expanded, Scopus and other databases
- **Rapid Publication:** 35 days (MPT), 14.2 days (Submission to First Decision), 5.8 days (Acceptance to Publication)
- **Rapid Development:** Impact Factor growths from 1.256 (2017) to 2.143 (2018)
- **Open Access:** No Copyright Constraints, No Space Constraints, No Extra Space or Color Charges
